SUBJECT INDEX

VOLUME 44, 1983

A-Bomb Survivors
  Dose revision for, fallout contribution to 693
Accelerators
  Neutron yields from copper beam stop for 72-MeV proton cyclotron 487
  Photon and photoneutron background for clinical linac, TLD measurements 115
  Radiation doses from clinical linac, effect of uranium collimators on 440
  Shielding of proton, transverse 79
Aerosols
  Gamma absorbed dose from ground-level release, Gaussian cloud approximation for 367
Alpha Particles
  Dose to epithelial and basal cells of bronchial tree from acute radioaerosol exposure 675
  Spectrometry for soil decontamination, phoswich probe for 684
Americium
  Determination in biological and environmental samples, rapid method for 688
Americium-241
  Intake and subsequent fate of ceramic particle containing, in man 329
Atomic Bomb
  Dose revision for A-Bomb survivors 693
  Genetic effects 283,435

Beta Particles
  Dosimetry using laser heating of hot-pressed TLD 75
  Shallow-dose equivalent, estimation using two-element dosimeter 373
  Spectrometry for soil decontamination, phoswich probe for 684
Bones
  See Skeleton
Building Materials
  Radiological impact of fly ash in cement 145
  Radon-222 emanation rate from, effects of sealants on 416
  Radon-222 transport through cracks in concrete slabs 249
Buildings
  Radon daughter concentration in U.K. 479
  Radon-222 content in, effect of internal wall covers on 243

Calcium-47
  Uptake reduction by DTPA, gastrointestinal 428
Californium-252
  Behavior in sea water, sediments and zooplankton 359
Canada
  Radon and thoron daughter measurements in uranium mines 165

Cancer
See Neoplasms
Carbon-14
Detection of $^{14}CO_2$ in radiotoxicology 160
Excretion patterns following occupational uptake 221
Release from TRIGA reactor 155
Carbon Dioxide
Detection of $^{14}CO_2$ in radiotoxicology 160
Carcinogenesis
Risk of, problems with linear-quadratic dose-response relationship 411
Risks for occupational exposure, life-table factors for estimating 317
Cerium-141
Deposition and retention on cool desert vegetation 349
Cesium-134
Deposition and retention on cool desert vegetation 349
Cesium-137
Behavior in environment adjacent to fuel reprocessing facility 658
Concentration in soils at Los Alamos National Laboratory 541
Content in deer in South Carolina 272
Content in subterranean crops 19
Shielding design for brachytherapy sources 554
Chelating Agents
See DTPA
Cigarettes
Radionuclides in filters of, distribution of alpha-emitting 422
Coal
Radon emission from burning, health effects of 441
Cobalt-60
Gamma doses in accidental occupational exposure 409

Dogs
Plutonium-238 and -239 nitrate comparative disposition in beagles, inhaled 275
Plutonium dioxide fragmentation in lungs of beagle, inhaled 135
Radon-to-radium ratios in skeleton of 61
DTPA
Effects on gastrointestinal uptake of alkaline earth radionuclides 428
Efficacy of ZnDTPA for decorporation of ^{238}Pu-TBP 645
Retention of ^{14}C-labelled, in human volunteers 45
Use for removal of plutonium introduced as tri-n-butylphosphate complex 623

Ecosystems (see also Plants, Soil)
Californium-252 behavior in sea water, sediments and zooplankton 359
Tritium transport in Savannah River, after tritiated water release 13

Fallout
Contribution to A-bomb survivor radiation dose 693

Food Chain
Radionuclide content in subterranean crops 19
Radionuclide transfer from soil to garden produce 469
Technetium and uranium sorption by and plant uptake from soils 635

Gamma Radiation
Dose rates of, sensitive survey instrument for environmental 379
Doses due to ground-level release, Gaussian cloud approximation for 367
Dosimetry in clinical linac treatment room, TLD 115
Dosimetry using NaCℓ:Ca 29
Spectrometry for soil decontamination, phoswich probe for 684
Whole-body counting, virtual nuclides method for 562
Gamma Sources
Errors in isocenter of Picker C-9000 teletherapy unit 553
Gastrointestinal Tract
Radioactivity following inhalation of aerosol, calculation of 662
Radionuclide uptake and removal from, age-dependent model for 609
Georgia
Radium and uranium concentrations in community water systems 1

Health Physics
Certification exam, odds of passing ABHP 172
Employee recruitment activity, 1977-82 601
Human Populations (see also Man)
Radiation exposure limits for, ionizing 63
Radiation risks from small doses 695

Iodine-127
Behavior in environment adjacent to fuel reprocessing facility 658
Iodine-129
Behavior in environment adjacent to fuel reprocessing facility 658
Iodine-131
Content in thyroids of meadow voles near Three Mile Island 175,177
Ionization Chambers
Use in survey instrument for environmental gamma dose rates 379

Krypton-77
Radiation absorbed dose estimates for PET 235

Laser Radiation
Threshold values for thermal retinal injury in monkeys and rabbits 519
Lead-210
Transfer from soil to garden produce 469

Man (see also A-Bomb Survivors, Human Populations)
Americium-241 intake and subsequent fate in ceramic particle 329

Excretion patterns following occupational uptake of ^{3}H-, ^{14}C- and ^{35}S-labeled compounds 221
Mucosal structure and radon in head carcinoma dosimetry 556
Phosphorus-32 body burden estimation by bremsstrahlung produced in skull 668
Plutonium-238 assessment in chest of, using Ge detectors 69
Radiation-induced teratogenic effect during embryonic growth 679
Suicide correlation with power-frequency magnetic fields 697,698, 699,700
X-ray medical exposure of embryo and fetus 84,85,86,87
Magnetic Fields
Power frequency correlation with suicides 697,698,699,700
Microwaves
Risk for neoplasia in mice 430
Monkeys
Laser thermal retinal injury

Neon-19
Radiation absorbed dose estimates for PET 235
Neoplasms
Dosimetry of head carcinoma, mucosal structure and Rn hypothesis 556
Risks from microwaves in mice 430
Neptunium-237
Metabolism studies impact on high-level waste hazard assessments 567
Neutrons
Depth-dose distributions in elliptical phantom 35
Detection of, ground scattering contributions in calibrations for 437,439
Dose equivalent of, calculating spectrum-averages values of 702
Dosimetry in clinical linac treatment room, TLD 115
Dosimetry of, analytical modeling of albedo TLD for 103
Kerma transmission through steel 277
Yields from copper beam stop for 72-MeV protons 487
Nuclear Facilities (see also Power Reactors, Research Reactors)
Cesium-137 content in deer in Savannah River environs 272
Cesium-137 soil sampling at Los Alamos National Laboratory 541
Occupational over-exposure case in chemistry lab in Egypt 405
Radionuclide comparative behavior in environment adjacent to Hanford fuel reprocessing facility 658
Tritium transport in environment from atmospheric release of tritiated water at Savannah River 13

Occupational Exposure
Cancer risk of, life-table factors for estimating 317
Cobalt-60 gamma doses in accidental 409
Data for Taiwan nuclear power station 65
Description of suspected case of over-exposure at nuclear chemistry lab in Egypt 405

Determination for clinical linac, effects of uranium collimators 440
Dose equivalents for dial painters and assemblers of radioluminous timepieces 501
Dosimetry records of radiography personnel, statistical evaluation of 168

Phantoms
Neutron depth-dose distributions in elliptical water-filled 35
Phosphorus-32
Body burden estimation by bremsstrahlung produced in skull 668
Pigs
Plutonium-239 metabolism in newborn and weanling 533
Plants
Cerium-141 and cesium-134 deposition and retention on cool desert vegetation 349
Radionuclide content in subterranean crops 19
Radionuclide transfer from soil to garden produce 469
Technetium and uranium uptake by 635
Tritium incorporation from tritiated-water exposure of short duration 666
Plutonium
Determination in biological and environmental samples, rapid method for 688
Metabolism of tri-n-butylphosphate complex of, in rats 623
Plutonium-238
Assessment in chest with Ge detectors 69
Decorporation of n-tributylphosphate complex of, efficacy of Zn DTPA for 645
Plutonium-239
Content in subterranean crops 19
Metabolism in newborn and weanling pigs 533
Plutonium-240
Content in subterranean crops 19
Plutonium Nitrates
Retention of ^{238}Pu- and ^{239}Pu-labeled, in beagles 275
Plutonium Oxides
Fragmentation of inhaled $^{238}PuO_2$ in beagle lungs 135
Polonium-210
Distribution in cigarette filters 422
Positrons
Absorbed dose estimates for ^{19}Ne and ^{77}Kr PET 235
Potassium-40
Content in subterranean crops 19
Power Reactors
Iodine-131 in thyroids of meadow voles near Three Mile Island 175,177
Occupational exposure data for Taiwan 65
Promethium-147
Dose equivalents for dial painters and assemblers of radioluminous timepieces 501

Proportional Detectors
Design of multi-element, for dosimetry 403
Protactinium-233
Absorption from gastrointestinal tract in rats and mice 425
Protons
Beam stop for 72-MeV, neutron distributions from copper 487

Rabbits
Laser thermal retinal injury 519
Radiation (see Alpha Particles, Beta Particles, Fallout, Gamma Radiation, Laser Radiation, Microwaves, Neutrons, Positrons, Protons, X Radiation)
Radiation Detectors (see also Ionization Chambers, Proportional Detectors, Scintillation Detectors, Semiconductor Detectors, Thermoluminescence Dosimeters)
Positioning of personnel monitoring badges 700
Radiation Doses (see also Occupational Exposure)
Computation of radionuclide particulate finite area fugitive source strengths 653
Exposure limits for ionizing, population 63
Genetic effects of atomic bomb 283,435
Hazards of, commentary on hormesis, public health and public policy 207
Problems with linear-quadratic dose-response relationships 411
Quality factor for high-LET 173
Revision of A-bomb survivor, fallout contribution to 693
Risks of, information programs on 575,576
Risks of small doses to human populations 695,969
Teratogenic effect during embryonic growth, quantitative determination of 679
Use of ALARA philosophy 595
Radiation Protection
Commentary on radiation hormesis, public health and public policy 207
Computer-aided drawings for laboratories using radionuclides 83
Use of ALARA philosophy 595
Radiation Units
Plurals of, regular 83
Radioactive Wastes
Burial ground geography, numerical analysis of 655
Hazards assessment of high-level, impact of ^{237}Np metabolism studies on 567
Incinerator for institutional 671
Radionuclides
Dose computation for particulate finite area fugitive source strengths 653
Radium
Concentrations in Georgia community water systems 1
Radium-226
Content in dog skeletons relative to ^{222}Rn 61

Content in subterranean crops 19
Dose equivalents for dial painters and assemblers of radioluminous timepieces 501
Transfer from soil to garden produce 469
Uptake reduction by DTPA, gastrointestinal 428
Radon
Effects on head carcinoma occurrence 556
Radon-222
Content in dog skeletons relative to ^{226}Ra 61
Content inside houses, effect of internal wall covers on 243
Emanation rate from building materials, effect of sealants on 416
Monitor for, description of integrating passive 413
Transport through cracks in concrete slab 249
Radon Progeny
Activity ratios of, method for estimating 703,704
Concentration estimate bias caused by concentration variations during sampling 267
Concentration in buildings in U.K. 479
Measurement in Canadian uranium mines 165
Plateout in radon box, effect of ion generator and mixing fan on 259
Research Reactors
Carbon-14 release from TRIGA 155
Respiratory System
Alpha dose to epithelial and basal cells of bronchial tree from aerosol exposure 675
Particles deposited in human nasal passages, removal by nose blowing 418
Rodents
Iodine-131 content in thyroids of meadow voles near Three Mile Island 175,177
Microwave risks for neoplasia in mice 430
Plutonium metabolism in rats introduced as tri-n-butylphosphate complex 623
Plutonium-238 decorporation from hamsters injected with TBP complex 645
Protactinium and thorium absorption from gastrointestinal tract in mice and rats 425
Ruthenium-106 inhalation by Fischer-344 rats, retention and dosimetry of 335
Ruminants
Cesium-137 content in deer in South Carolina 272
Tritium metabolism in lactating dairy cow 127
Ruthenium-106
Inhalation by rats, retention and dosimetry of 335

Scintillation Detectors
Development of phoswich alpha-beta-gamma spectrometer for directing decontamination of soils 684
Virtual nuclides method for whole-body counting and quality control 562
Scintillators for tritium counting, recovery of Insta-Gel 570

Semiconductor Detectors
Performance of silicon-diode pocket chirper 158
Use of Ge detectors for Pu assessment in chest 69
Shielding
Design for brachytherapy sources 554
Design of diagnostic x-ray, based on empirical model 507
Dose outside proton accelerator 79
Shielding Materials
Neutron beam kerma transmission through steel 277
Skeleton
Radon-to-radium ratios in dog 61
Soil
Cesium-137 concentrations at Los Alamos National Laboratory 541
Decontamination of, alpha-beta-gamma spectrometer for directing 684
Radionuclide transfer to garden produce 469
Technetium and uranium sorption by and plant uptake from 635
South Carolina
Cesium-137 content in deer in 272
Strontium-85
Uptake reduction by DTPA, gastrointestinal 428
Strontium-90
Beta depth-dose curves in mylar 395
Sulfur-35
Excretion patterns following occupational uptake 221

Taiwan
Occupational exposure data for nuclear power station 65
Technetium
Sorption by and plant uptake from peaty and sandy soils 635
Technetium-99
Behavior in environment adjacent to fuels reprocessing facility 658
Thermoluminescence Dosimeters
Modeling of albedo, for neutron dosimetry 103
Phosphor $Li_2B_4O_7$:Cu for 387
Properties of NaCℓ:Ca for gamma radiation 29
Response to ^{133}Xe in environment, projected 579,582
Use of hot-pressed, for beta dosimetry 75
Thorium
Determination in biological and environmental samples, rapid method for 688
Thorium-228
Absorption from gastrointestinal tract in mice and rats 425
Thorium-232
Content and relative activity in imported gas mantles 649
Tritium
Dose equivalents for dial painters and assemblers of radioluminous timepieces 501
Excretion patterns following occupational uptake 211
Incorporation into plants exposed to tritiated-water releases of short duration 666

Metabolism in lactating dairy cow 127
Scintillation counting of, recovery of Insta-Gel used in 570
Transport in environment from atmospheric release of tritiated water 13

United Kingdom
Radon daughter concentration in buildings 479
Uranium
Beta depth-dose curves for natural and depleted, in mylar 395
Concentrations in Georgia community water systems 1
Sorption by and plant uptake from peaty and sandy soils 635
Transfer from soil to garden produce 469
Uranium Mill Tailings
Radon emission from, health effects of 441
Uranium mines
Radon and thoron daughter measurements in Canadian 165

Water
Radium and uranium concentrations in Georgia community water systems 1

X Radiation
Exposure of human embryo and fetus, medical 84,85,86,87
Shallow-dose equivalent, estimating using two-element dosimeter 373
X-Ray Equipment
Linearity for diagnostic, limits of 78
Radiation levels associated with C-arm 76
Radiographic workload and use factors for orthopedic facilities 53
Shielding design based on empirical model 507
Xenon-133
Dosimetry in environment, problems in TLD 579,582
